Tal Simhayev

Security Researcher

Personal Details

058-500-1149 linkedin.com/in/talsim talsimhayev@gmail.com github.com/talsim

Experience

- Extensive hands-on experience working with static and dynamic binary analysis tools including:
  - IDA Pro, Ghidra and Radare2 disassemblers.
  - Dynamic and Static debugging (e.g. GDB).
  - Knowledge in x86/x64 Assembly language.
  - Vulnerability research - e.g. exploiting DirtyCow vulnerability in the Linux kernel to gain root privileges github.com/talsim/root-dirtyc0w.

- Participated in CTF events with my team.
  - **See my blog post in Medium**: ROP Emporium write4 - by Tal Simhayev
  - I document all my knowledge here: My experience with CTFs
  - Published on **CTFtime:** pingCTF 2023 - dangle-me pwn challenge writeup

- Experience with C/C++ languages which includes vast knowledge in Windows OS (writing a KeyLogger software github.com/talsim/KeyLogger by using **WinAPI**) and Linux OS internals (implementing Linux shell - github.com/talsim/Linux-Shell).

- Extensive networks knowledge:
  - TCP/IP model, working with Sockets, Server-Client architecture, HTTP server writing, good understanding of network protocols - UDP, TCP, DNS, DHCP, etc. (github.com/talsim/Networks)
  - Network traffic analysis with Wireshark software, and usage of Scapy package in Python.

Education

2016 - 2022

- Student at ORT-Rogozin High School, Kiryat Gat. Major in Computer Science - 10 points (score 100) & Physics - 5 points.

Community Involvements

2019 - Young Initiators in Education project by the Center for Educational Technology:

- Participated actively and brought up ideas on how to improve mathematics studies in Israel middle schools with an emphasis on personalized learning.

2019 - Entrepreneurship project by the Tnufa Center in Kiryat Gat:

- During the project, I acquired skills and tools for developing entrepreneurship, marketing skills and branding as well as understanding the high-tech world.
